

Microsoft expertise built for the toughest federal missions.

Bravo Consulting Group is a Microsoft-focused IT services and consulting firm supporting federal civilian agencies, the Department of War, and the Intelligence Community. Since 2007, our cleared teams have helped agencies modernize legacy environments, strengthen security, governance, and compliance, and turn trusted information into actionable intelligence across secure, classified, and air-gapped environments.

OUR THREE PILLARS

Foundation

Ground you can build on.

Clear away legacy platforms, sprawling file shares, and brittle workflows, including SharePoint Server 2016 and 2019, InfoPath, and SharePoint Designer workflows that are now out of support. We build a modern, secure, standardized Microsoft environment that lasts. Not migration for its own sake, but a foundation for what comes next.

Confidence

Data you can stand behind.

Build security, governance, and compliance you can prove. With Purview, Defender, Entra, and records management, we help agencies meet Zero Trust targets and federal records requirements, so information is defensible, findable, and ready to retain, share, or release when it matters.

Intelligence

Answers you can act on.

Copilot, AI, and analytics that turn trusted information into advantage. AI is only as good as the data beneath it, which is why intelligence comes third, not first. When the foundation is modern and the data is governed, AI stops being a demo and becomes answers your people can act on.

Delivered where your mission runs: Microsoft 365 GCC, GCC High, and DoD · Azure Government · classified and air gapped networks
